Tuatara strategies

Tuatara now live on 35 of New Zealand's islands. Help DOC out and decide if the protection strategies will really work. Just fill in the squares.

Strategies to keep tuatara populations alive and well ⇩	**What do we need to know?**	**What are the good points? Why might it work?**	**What are the bad points? Why might it not work?**	**Be creative! What's a new idea that will help this strategy?**
Exterminate all rats on tuatara islands. Investigate new islands for tuatara				
Develop a security system to discourage illegal island visitors like poachers.				
Monitor (watch and count) island populations of tuatara in better ways.				
Keep breeding tuatara in captivity				
Make sure people learn more about tuatara and even get a chance to see them.				
Research, to find out how possible predators like weka, kiwi and takehe might affect tuatara populations.
