

## Where do we fit?

Classify these animals by placing the **key feature** in the correct column . You can use a feature more than once. Then, add **examples** of these animals to the right column too.

Fish	Amphibians	Reptiles

1. **We have scaly skin that helps prevent us from drying out.**
2. Our young may be born live or hatched from eggs.
3. **We live on land but most of us depend on water at least for breathing.**
4. Most of us breathe through gills.
5. **We are cold-blooded.**
6. Our young usually breathe through gills but as adults we breathe through lungs or skin.
7. **Our skin is usually moist and doesn't have scales.**
8. Most of us have primitive legs.
9. **We breathe using lungs.**
10. Most of us have skeletons of bone and scales but some of us have skeletons of cartilage and small bony plates for reinforcement. A few of us have no scales or jaw!
