

All insects
have these
characteristics

What do you think?
Just circle the answer

Body parts?

2

3

Legs?

6

8

More!

Eyes?

6 simple ones

8 simple ones

Usually 2 but

sometimes 5

Mouthparts?

3 pairs

1 pair with fangs and
poison

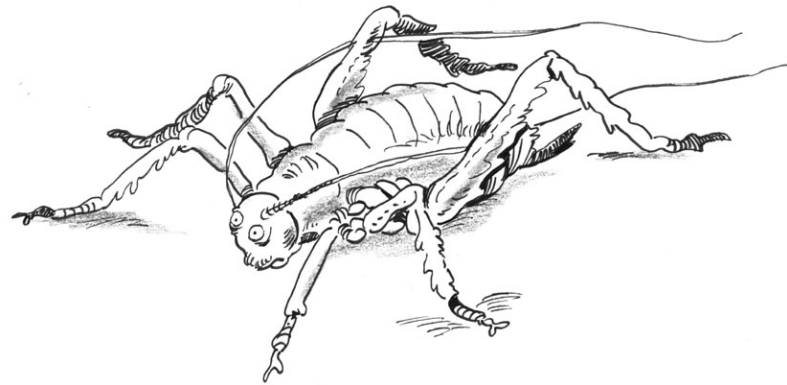

Wings?

Usually

No

What's an insect?

Label and name the
body parts

An ecologist from the USA has said,

"New Zealand is as close as we'll get to having the
opportunity to study life on another planet."

Why might the scientist have been looking at
this insect
when he said that?

This insect
has these
characteristics

6 legs

8 legs

More!

Wings

Or

No wings

A long thin body
or
well developed legs
and long feelers

I am a

Beetle

Fly

Moth

Giant Weta

Cicada

Earwig

Stick insect

Now name one
characteristic each
of the other 6 bugs
have, that I don't.
